Senior Analytics Manager | Revenue, Operations & AI Analytics

Analytics leader with 7+ years of experience driving revenue, operations, and workforce analytics across fintech, CPG, and healthcare domains. Delivers measurable business impact, including \$50M incremental revenue, \$1.4M cost savings, and large-scale executive reporting solutions. Expertise in forecasting, cohort analysis, and AI-driven insights to optimize funnels, staffing, and performance. Leads cross-functional initiatives, mentors analysts, and builds scalable dashboards and reporting frameworks for senior leadership.

CORE COMPETENCIES

- Workforce Planning & Capacity Modeling
- Revenue & Operations Analytics
- Forecasting & Regression Modeling
- Cohort, Funnel & Behavioral Analysis
- KPI Design & Executive Reporting
- Cross-Functional Leadership
- Dashboard Strategy & Reporting Frameworks
- AI-Driven Analytics & NLP Insights
- Process Optimization & Incentive Strategy

CAREER HIGHLIGHTS

- **AI-Driven Workforce Optimization:** Incorporated AI call summarization and OCR automation into WFM capacity planning to model AHT reductions, proactively reducing 30 FTE and ~\$1.4M in annualized cost.
- **AI-Based Call Reduction Analytics:** Leveraged AI-generated call summaries and transcript analysis to identify drivers of inbound call volume and call deflection opportunities, quantifying ~\$370K annual savings.
- **Revenue & Collections Analytics:** Delivered \$50M incremental balances moved through the collections funnel analysis and delinquency segmentation.
- **Incentive Strategy Optimization:** Designed an agent incentive framework using weighted performance metrics; generated \$6M incremental balances moved by improving high-delinquency collections.
- **Executive Reporting & Dashboard Scale:** Developed 50+ Tableau dashboards across operational and revenue funnels; reduced weekly performance reporting time by 98%.
- **Operational Transformation Impact:** Built initiative sizing dashboards for CCaaS migration and AI-driven improvements; identified ~\$500K annualized FTE savings.

PROFESSIONAL EXPERIENCE

EXL Analytics | Global professional services company specializing in operations management and analytics Senior Manager

San Francisco, CA
June 2022 - Present

Lead operations analytics for a US-based fintech client, managing end-to-end delivery across workforce planning, capacity planning, collections analytics, executive reporting, and dashboard strategy; mentor analysts, define KPIs, and partner cross-functionally with operations, finance, and product stakeholders.

- Built workforce management and capacity planning models using forecasting, regression techniques, and operational drivers; supported monthly staffing decisions across inbound and outbound operations.
- Modelled staffing impact of AI-driven tools, including Cresta auto call summary and OCR-based document processing; partnered with VPs to incorporate AHT reduction into WFM plans, proactively avoiding overstaffing and reducing 30 FTE (~1.4M annual cost).
- Delivered \$50M incremental balances moved through collections analytics, including concurrent loan analysis, payment reduction strategy, and debt settlement optimization using cohort and behavioral analysis.
- Designed and implemented an agent incentive optimization framework using weighted performance metrics and rank-based allocation; increased collections from higher delinquency buckets and generated \$6M incremental balances moved.
- Developed 50+ Tableau dashboards across operational and revenue funnels, enabling real-time executive visibility and reducing weekly performance reporting preparation time by 98%.
- Conducted root-cause and funnel analysis to explain decline in Promise-to-Pay rates; decomposed 1200+ bps change across operational initiatives, portfolio mix, and macroeconomic factors for executive leadership reviews.
- Leveraged AI-generated call summaries (Cresta) and ChatGPT-assisted analysis to identify drivers of inbound call volume and call deflection opportunities; quantified ~\$370K annual cost savings through targeted process improvements.
- Designed initiative sizing dashboards to quantify operational transformation impact, including CCaaS migration, delivering ~\$500K annualized FTE savings and improving executive decision-making.
- Partnered with cross-functional teams to prioritize analytics roadmap, standardize reporting frameworks, and support business development through RFP responses for 8+ clients.
- Received Game Changer Award and Pioneer Award at EXL for quality of deliverables and strong client commitment.

Fractal Analytics | AI-driven analytics consulting for Fortune 500 consumer businesses Consultant

Mumbai, MH
May 2019 - May 2020

Served as analytics consultant for Fortune 500 CPG clients, owning Power BI reporting, demand and shipment analytics, and go-to-market performance tracking; partnered with commercial and category teams to define KPIs and deliver decision-support insights.

- Assessed COVID-19 impact on product shipments and demand patterns by analyzing market share, regional sales variance, and promotional lift; identified drivers of demand fluctuations across categories and regions.
- Built Power BI dashboards to track new SKU performance, market penetration, and initiative effectiveness; solution adopted by 200+ internal users for go-to-market decision-making; appreciated by the client for developing an initiative-tracker report.
- Conducted cohort and behavioral analysis using the Hook framework to identify drivers of repeat purchases; found sample + coupon users were 45% more likely to repurchase within 30 days.
- Automated Nielsen data processing using R-based scripting and loop optimization; reduced monthly reporting effort by ~3 hours and improved delivery timelines.
- Delivered Power BI training sessions for 50 analysts and business users across locations, improving adoption of standardized reporting and visualization practices.

CitiusTech Healthcare | Healthcare technology and analytics solutions for providers and payers

Mumbai, MH

Software Engineer

June 2016 - May 2019

Led automation and modernization of Finance and HR reporting by transitioning Excel-based processes into Power BI dashboards using SQL pipelines, DAX measures, and scheduled refreshes; partnered with stakeholders to define KPIs and reporting requirements, reducing manual reporting effort by ~50% and enabling real-time leadership visibility.

- Reconstructed 20+ Patient-to-Payment analytics reports from Tableau into Power BI by redesigning data models, translating LOD logic into DAX, and rebuilding interactive drilldowns and filtering logic, enabling seamless BI platform transition with minimal functionality loss.
- Optimized enterprise Tableau dashboards built on 10M+ row healthcare datasets by implementing centralized extracts, incremental refresh logic, aggregation layers, and scheduled pipelines, achieving 87% reduction in dashboard load time (60s to <8s).
- Led performance optimization of 30+ Tableau dashboards across Patient, Provider, Facility, and Scorecard analytics by removing duplicate records, simplifying calculations, and shifting logic to SQL views, reducing dashboard latency by ~80%.
- Mentored junior analysts on BI development standards and dashboard performance optimization while supporting onboarding and peer reviews; received Certificate of Appreciation for exceeding expectations in Power BI reporting delivery.

InfiniteX | Project Intern (2022)

- Built Google Looker Studio dashboards by integrating Google Analytics data to track website performance and campaign-level engagement; delivered insights to optimize marketing channels and improve user acquisition.

IDFC First Bank | Digital Transformation Intern (2021)

- Evaluated 80+ fintech solutions across 21 vendors for AI-based credit underwriting and RPA chatbot automation; synthesized inputs from 25+ stakeholders to identify automation opportunities and support digital transformation.

EDUCATION

Master of Business Administration | School of Business Management (SBM), NMIMS | Mumbai, MH

Bachelor of Technology in Electrical Engineering | Veermata Jijabai Technological Institute (VJTI) | Mumbai, MH

Certifications: Generative AI for Everyone (Andrew Ng), Google AI Professional Certificate (Google)

SELECTED ANALYTICS PROJECTS

AI-Driven Call Reduction & WFM Capacity Optimization (EXL): Built an AI-informed call reduction strategy using transcript NLP (Cresta) and SQL segmentation; identified manual-review loans generating 60% of pre-issuance calls. Modeled staffing impact of AI tools (auto-summary, OCR, IVR improvements) using WFM capacity planning, reducing ~30 FTEs and ~\$1.4M annual cost.

Concurrent Loan Performance Dashboard (Tableau): Designed a Tableau dashboard to track incremental concurrent loans and agent-level workload distribution across collections teams; standardized productivity tracking and replaced manual reporting. Enabled visibility across 3 collections teams and ~40 agents, supporting workload balancing and capacity planning decisions.

Incentive Strategy Analytics (Operations Analytics): Developed an incentive performance framework linking payment KPIs, listing rate, and agent productivity metrics to compensation levers; revamped legacy incentive structure by introducing difficulty-adjusted metrics to level performance evaluation for agents handling higher-delinquency loans.

TECHNICAL SKILLS

- **Analytics & BI Tools:** Tableau | Power BI | Excel (Advanced) | Google Looker Studio | Executive Dashboards
- **Data & Querying:** SQL | Data Modeling | Data Aggregation | ETL Logic | Stored Procedures | Data Validation | Data Pipelines |
- **AI & Advanced Analytics:** NLP-based Transcript Analytics (Cresta) | OCR Automation Impact Modeling | AI Capacity Planning
- **Programming & Automation:** Python | R | DAX | Power Query | Tableau Calculations | SQL-based Automation
- **Data Platforms & Enterprise:** Five9 | Verint | ClearView | Nielsen Data | Google Analytics (Advanced) | Tableau Server
